Every participants stated that they acquire new ideas and techniques for development work

Central government

- Implementation of development should start with a good foundation and cooperation
- Agriculture and water system development

Local government

- Technique and cooperation for development. (2)
- Thailand solved drug problems by eradication and substitution crop programme, Myanmar must also find alternatives to solve drug problems
- Everyone, from government to villagers, need to join hands for development

Villagers

- Alternative development is necessary for solving illicit (opium) cultivation (2)
- A development project needs to engage all stakeholders
- Good agricultural practices
- Government needs to develop infrastructure such as road, electricity
- We (Myanmar) want to solve problems of drug users in villages so they have better lives.
- We (Myanmar) do not want to have drug consumption in community

Topics participants will discuss with their communities

Government

- Hands-on experiences are good for learning about the development work.
- Will tell others in my organisation about the visit

Local government

- Every aspects will be discussed with villagers as the model can directly be applied to Naung Tar Ya area.
- Will talk to villagers and decide what can be used in the area
- Will tell others in my organisation about the visit
- Myanmar needs to develop community to be better

Villagers

- If the development work applies to the area, it will benefit villagers (2)
- Will discuss with villagers in hometown on what have been learnt (2)
- Knowledge about agriculture and drinking water development for villagers
- Water system development
- Village development
- Explain to villagers to change opium cultivation area to forest, perennial trees so opium farmers can have better livelihood

Most beneficial aspect

Central government

- Water system development (2)
- Gabion box

Local government

- Soil-cement technique (2)
- Concrete weir (2)
- Agriculture (2)
- Ram pump
- Good practice of cattle and pig raising
- Management and adaptation

Villagers

- Tea processing (6)
- Water system (5)
- Agriculture (4)
- Solar cell for water pump (2)
- Soil-cement technique for weir construction

Missing aspects

Central government

- Livestock development programme

Villagers

- Road construction method
- Community mobilization
- Livestock development
- Banana plantation technique
- More details of Gabion box technique for weir construction
- Set-up of electricity facilities in rural area

Elements to be explored in future events

Central government

- Learn more about good examples of Thailand
- Comprehensive livestock programme
- Agriculture technique

Villagers

- Agriculture technique (3)
- My area (Naung Ta Yar) has a lot of drug problems (cultivation and drug use), if GPD PD can go and have a meeting, it will be good.
- In-depth Sustainable Alternative Development principles
- Reforestation model
- Handicrafts development programme

Other comments for improvement

Central government

- The structure of training should start with lectures about techniques and follow by hands on experiences/ work in the field
- Need longer time to learn how to implement development work on the ground

Local government

- It would be better to stick to planned schedule, not changing plan all the time (2)
- It would be good to cover all steps in more details for hands-on work before working in the field
- Weir constructions should be more well-planned, for example, daily achievements should be pinned down for each working day

Villagers

- Need more discussion time on how to implement development programme to Naung Ta Yar township, Myanmar
