

The Nippon Foundation Group

Projects in Myanmar

The Nippon Foundation (TNF) has been supporting and implementing projects in Myanmar since 1976.

Initial projects were concerned with development of human resources and treatment of leprosy patients through the distribution of medicine. Over time we have expanded our activities across a wide range of fields.

Our current activities include support in Health, Education, Human resource development and support for people with disabilities as well as support to conflict-affected communities.

● Peace Building

We conduct three pillars of activities:

- ① Build trust between the government and ethnic armed organizations,
- ② Provide support to conflict-affected people,
- ③ Promote understanding of civilian control

● Human Resource Development

We support professional training to conflict-affected people to gain an opportunity of employment and earn a stable income.

● Health

We aim to improve the health care service through traditional treatment and donation of social welfare vehicles.

● Education

We implement school construction projects led by strong ownership of the local residents for community development, focusing on border areas where education infrastructure trails behind.

● Agriculture

We strive to increase the farmers' income and enhance the community development through support farmers to obtain skills and to ship their crops to the enterprise.

● Support for people with disabilities

We provide support to people with disabilities to promote their independence through expanding their job opportunities and empowerment.

Main Initiatives

Peace Building

1

Delivery of Humanitarian Support (Food and Non-food items) for Conflict Affected Communities

In consultation with Union and State governments and Ethnic Armed Organizations (EAOs), relief items including food, medicine, mosquito nets and solar lanterns have been procured and distributed to over 1 million people living in conflict affected communities in the areas controlled or influenced by EAOs.

*Number of distributed as of October 2016

Rice	: approx. 26,300tons
Pulse	: approx. 200tons
Salt	: approx. 100tons
Cooking Oil	: approx. 150,000liters
Clinical Medicine	: 437sets
Solar Lanterns	: 43,922sets
Mosquito Nets	: 43,922sets

	Total	19,105,600 USD

2

Support to Conflict-affected People in Myanmar (Rehabilitation Programme) Phase1

In Southeastern areas controlled or influenced by Ethnic Armed Organizations(EAOs), The Nippon Foundation provides support to conflict-affected people for community reconstruction through the rehabilitation programme to stabilize their everyday lives. Moreover, the Nippon Foundation will support Myanmar's peace building process by further promoting trust building between the Myanmar government and EAOs.

Providing college education to refugees of the Thai-Myanmar Border

There are 9 refugee camps in this border area due to conflict between Myanmar military and Ethnic Armed Organizations after Myanmar gained its independence in 1948. It is difficult for youth living in refugee camps to enroll in higher education institutions in Myanmar and Thailand. When the youth returns to their homeland in the future after peace has been achieved but has not received sufficient education, they may have lower employment opportunity, and thus more difficulty to make a living. Therefore, The Nippon Foundation provides support for equipment and teacher capacity enhancement in Karenni National College (KnnC), the only higher education institution in the area. We aim to provide opportunities for youth to obtain higher education in a sufficient environment.

Regional Development through School Construction in Shan and Kayah State

428 schools have been completed in Shan state so far, and from 2018 to 2022, 138 schools in Shan and Kayah state plan to be built. In this project, community members participate in the school construction process and the materials and labor provided by the community are calculated by cost to be used as "Community Development Funds." This fund is increased by income-generating projects such as simple hydroelectric power generation and micro-finance activities and used for post-construction operation of the schools and community development by the residents.

Regional Development through School Construction in Ayeyarwady Region

72 schools have been built since 2013 in the Ayeyarwady Region. First, one fourth of the school construction cost will be collected from villagers. Then, a sturdy school able to withstand flood damage will be constructed. The donation by villagers will be transferred back to the community as funding for a community-based development project. These projects include paddy field development and student dorms. Revenue from these projects are used for post-school management and community development.

Japan-Myanmar Military Officials Exchange Program

Based on a memorandum exchanged between the Nippon Foundation and the Armed Forces of Myanmar, with the cooperation of the Ministry of Defense and Japanese Self-Defense Forces, in December of 2014, 10 military personnel with the rank of General were invited from Myanmar to Japan, where they underwent training to learn what an army should be like in a democratic nation. The program is planned to take place once a year from 2014 to 2018. The training mainly involved visiting the Ministry of Defense and Self-Defense Force bases and learning about Japan's defense policy and personnel training.

Managing Japanese Language Course in Myanmar

Since April 2015, Japanese language instructors of the Shinjuku Japanese Language Institute have been dispatched to the Myanmar Defense Services Academy (DSA) to provide the Japanese Language Course, which trains 40 young officers every year. The objective of this project is to promote the defense exchange as well as the diplomatic relation between Myanmar and Japan. This will be achieved through training officers to become proficient in Japanese and to be capable of becoming Japanese language trainers which will enhance self-management of the Japanese Course by the Myanmar DSA. 12 officers have been dispatched to the Ministry of Defense of Japan and 2 officers was assigned to be the assistant teachers of the Japanese Course from May 2017 (In 2016, 1 of the 2 officers served as a Japanese interpreter of the Myanmar Armed Forces in 2016).

Myanmar National Rehabilitation Hospital PO Clinic

Prosthetics/Orthotics services have been provided at the National Rehabilitation Hospital, Yangon, the largest city in Myanmar, to meet the needs of people there. Myanmar government officials and the International Red Cross have considered to expand the service provided area, for example to Mandalay and consultation is on-going. National Rehabilitation Hospital used to provide P/O services to 400 people per year. Now it has been increased to 2,200 per year with our support. The Nippon Foundation has also supported schools of P/O in Myanmar's neighboring countries, and graduates from Indonesia and Cambodia have worked here and contributed to providing services.

Donation of Used Welfare Vehicles

Since 1994, The Nippon Foundation has distributed welfare vehicles in order to support the community lifestyles of disabled persons and the elderly in Japan. Those vehicles that have fulfilled their roles in Japan, but are still serviceable, are converted into ambulances to reinforce the emergency medical services in Myanmar. Some of the vehicles are not converted and are allocated across Myanmar to be used for public health purposes. A total of 258 vehicles have been donated to Myanmar up to FY 2015.

Distribution of Traditional Medicine Boxes

Over three years from 2009, 7,000 traditional-medicine boxes containing seven kinds of natural remedies manufactured at Myanmar's National Traditional Medicine Factory have been distributed to 14 states and regions all over Myanmar (500 boxes per region, one box per village), serving some of the villagers' health needs. The Ministry of Health's Department of Traditional Medicine is in the process of adding another 1500 boxes/villages per state over three years from 2012, bringing the distribution to roughly 28,000 villages all over Myanmar. Furthermore, a Myanmar medicinal plant pharmacopoeia containing 20 kinds of medicinal plants (including the seven in the medicine boxes) has been completed by a Pharmacopoeia Development Committee Chaired by the Minister of Health, with work on a second volume currently underway. Japanese experts, including some from the University of Toyama, are also providing assistance by being part of the development team. Moving forward, detailed data will be collected, which will be used as a basis for improving the medical treatment situation in villages.

Implementation and Policy Recommendation on Human Rights Advocacy Training for People with Disabilities in Myanmar, and Disability-Inclusive Business Incubation Center Operation

Leadership trainings have been offered to potential young leaders with disabilities for two main goals: 1) to promote social inclusion of persons with disabilities through enlightening them and 2) to eliminate discrimination and prejudice towards people with disabilities. Trainings for establishment of self-help branches and trainings for improving management for the established branches have also been provided. 110 young persons have received this leadership training and 24 branches have been set up since 2011. The total number of members is over 2,200 today. Beginning in 2017, the second five-year plan calls for the strengthening of the head office's management functions and support for local branches. The focus on existing social work activities will also be further enhanced. In addition, the first disability-inclusive business incubation center in Myanmar was established in August 2014 to expand their job opportunities and support disability-inclusive business. This center offers basic ICT and English education programs to persons with disabilities and plays a role as a support stronghold to launch the business.

Training School for Traditional Medical Blind Massage

The project purpose is to provide a training course using a specially made curriculum for visually impaired persons to acquire the medical massage techniques used since ancient times in Myanmar. The training's focus will mainly be on acquiring practical skills, but also includes lectures concerning anatomical theory and traditional Myanmar medical massage techniques. The objective is the achievement of increased independence and income for visually impaired persons participating the course. The school was opened in January 2016 in Mandalay.
